

Molybdenum Metalin 250

Product Data Sheet

Chemical Name:	Molybdenum Metalin 250.
Grade:	Agricultural.
Act 36 of 1947 Reg No:	B 4243
HTC Code:	2841.70
Appearance:	Yellow coloured liquid.
Packaging:	1 ℓ High density polyethylene (HDPE) Agritainer.
Recommended Use:	Liquid fertilizer.
Foliar Application:	Ensures correct nutrient at correct timing for immediate uptake by leaves and/or fruit.
Molybdenum function within plants:	<ul style="list-style-type: none">• Essential in nitrogen fixation and nitrate reduction.• Influences protein synthesis and sulphur metabolism.• Pollen, fruit, seed and grain formation.• Plant growth.
Specifications:	Mo (Molybdenum) 250 g / ℓ minimum.
	Density ± 1.61 kg / ℓ

The Metalin product range offers the following advantages:

- ✓ Nano-engineered particles (smaller is better).
- ✓ High nutrient concentration.
- ✓ Pours and disperses easily into spray tank.
- ✓ ISO 9001, 14001 and OHSAS 18001 certified.
